

Michelli[®]
WEIGHING & MEASUREMENT

SVT3

Third Generation Controller

Seamlessly capture data on each truck as it enters or exits your facility

Stop wasting time chasing down ticket information, matching tickets with trucks, then manually entering the information into your system. Use the SVT3 to integrate our intelligent software into your existing truck scale system, and let it do the work for you. The SVT3 helps ensure you'll never miss another truck.

HELPS MAINTAIN ACCURACY

- Force return to zero feature helps ensure each truck is weighed only once
- Front & rear pictures provide proof of proper placement on scale deck prior to weightment

COMPATIBLE WITH MOST SYSTEMS

- Works well with most existing software & any scale with a continuous output
- SVT3 software helps your weighing system determine the right time to take a picture of the truck

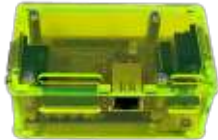

CAPTURES & RECORDS DATA

- Record weightment with a timestamped date for accurate recordkeeping
- Store these photos in web format, then automatically create a web page to enable off-site viewing

Effortlessly identify which ticket coordinates with which truck

The SVT3 from Michelli ensures users have information on every weighment

01:48:29 pm 01/05/2012
Inbound 69880 LB

01:51:12 pm 01/05/2012
Inbound 68140 LB

01:53:12 pm 01/05/2012
Inbound 84280 LB

Store Weight Data, Time, Date & Pictures in HTML

The SVT3 captures data as each truck is weighed, then displays the information on a web page, allowing users to view information on every truck that has entered or left the facility.

Let the Michelli Weighing & Measurement team simplify your data management
